

SIZE CHART

LENGHT MEASUREMENT

METATARSAL MEASUREMENT

STEP 1 Lenght measurement

- Place a piece of paper on the floor, against the wall.
- Wear the socks you use for riding
- Step on the paper with your heel touching the wall behind.
- Mark the longest toe on the paper (make sure do not move the heel from the wall or ask someone to help you) so measure from the wall to the marking.

Do the same operation above for both feet and write down the longest measure.

STEP 2 Metatarsal measurement

Now Measure the metatarsal / width circumference of your feet.

NOTE:

to get the correct circumference you have to measure on the most pretuberant bones - see pictures as example.

Do the same operation above for both feet and write down the longest measure

STEP 3 Model FIT

Check in the list below which FIT has the model you are interested in.

STEP 4 Size chart

Now that you know the shoes model FIT, your feet lenght and width, look at the size chart to get the right size.

IMPORTANT for COMFORT

If your metatarsal/width measure is over the measure you find in the chart, pick **HALF SIZE MORE** then the suggested

HOW TO READ THE CHART

Look at the chart corresponding to the model's FIT you wanna buy, find the line with the lenght of your feet, check the metatarsal/width measure: if your measure stay between the chart measures you can pick the size on the right, but if your measure is bigger, we suggest **HALF SIZE MORE**.
