

DETERMINE YOUR GLOVE SIZE

Open your hand and place a tape measure around your base knuckles (do not include the thumb).
Now make a loose fist and measure the circumference:

(If you do not have a tape measure at your disposal, you can use a thread to take the measurement and then determine the length of the thread using a ruler).

Using the size chart below you can now determine your glove size:

Roeckl Sports Sizes (Europäische Sizes)	Ladies						Men						
	6	6,5	7	7,5	8	8,5	9	9,5	10	10,5	11	11,5	12
Circumference of Hand in cm	16,5	17,6	18,9	20,3	21,6	23,0	24,3	25,7	27,0	28,4	29,7	31,1	32,4

The european glove sizes for adults are measured in old inch (French: Pouce). One pouce is approx. 2.7 cm.
Size 8 is therefore 8 pouce = 21.6 cm.

The given sizes are just a guideline. Gloves are designed differently according to their function:

- **Biking gloves** are generally made from elastic materials with a comparatively tight fit, in order to have the full transfer of power from the hands to the handle bar.
